

This application uses numeracy skills from the following skills units:

- **Problem Solving**
- **Calculator Use**
- **Number A**
- **Calculation A**

You are a casual stock packer paid at \$9.60 an hour.

You pack 8 boxes of machinery parts each hour.

- 1 On Wednesday you work from 8am to 12pm (noon).
 - a) *What is your pay for this shift?*
 - b) *How many boxes do you pack in this shift?*
- 2 On Thursday you start work at 6.50am and finish at 11.05am.
 - a) *What is your pay for this shift?*
 - b) *How many boxes do you pack in this shift?*
- 3 For your two days of work, find your total:
 - a) *pay*
 - b) *number of boxes packed.*
